

# Apache Depot

## Table of contents

1. Apache Depot.....	1
2. Sub-Projects.....	1

## 1. Apache Depot

The Depot Project deals with integrated tools for automating downloading (with security checks), publishing (new artifacts) and managing the contents of the apache repository. It also focuses on additional tools for manipulating metadata of the artifacts.

## 2. Sub-Projects

<a href="#">Update</a>	Update Classes, querying repositories, downloading, etc.
<a href="#">Version</a>	Version Classes, parsing versions, sorting versions, etc.
<a href="#">Common</a>	Common (Utility) Classes
